Excel G

A NEW GENERATION
OF SLIDE

OPENING

FORMENTI & GIOVENZANA

Excel G

With more than fifty years of experience in manufacturing drawer slides, Formenti & Giovenzana is now extending its range of products introducing the concealed slide Excel G, a new line completely designed and made in Italy.

Pursuing the goal of always offering the best compromise between cost and performance, the product originates from the experience built up with the historic Excel N and aims to expand and enhance its features and functionalities:

- **SlowMotion Technology for controlled closing**
- **OneTouch and OneTouch Synchro System for a highly-performing elegance**
- **Two different systems for the mounting onto the drawer: Plug-In and Easy-Fix**
- **Standard and custom configurations**
- **Certified dynamic load up to 30 kg**

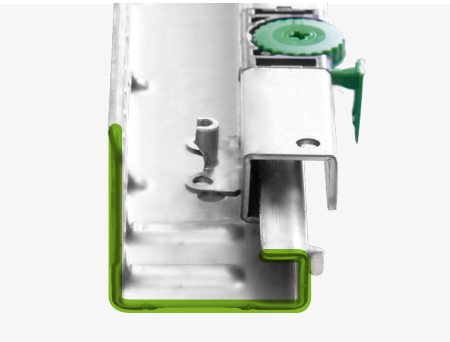
SIMPLICITY IN THE SHAPE

Thanks to the introduction of a "G-shaped" section into the structure and configuration of the profile, the slide acquires a greater mechanical strength in terms of dynamic load, increased to 30 kg, resistance and durability. The solidity is guaranteed in the shape and during the usage.



TINY DETAILS
THAT MAKE THE DIFFERENCE

The slide structure has been improved with a range of technical details that enhance its reliability and performance:
· new bearings for a more silent sliding
· a stronger activator for a greater stability of the damped system
· increased resistance of the back hook for a highly stable slide-drawer coupling

ELEGANCE OF THE MOVEMENT

The SlowMotion Technology, integrated in the Excel G slides, ensures a controlled and uniform closing under any condition and a smooth and soft drawer opening. The OneTouch System, now also available in the Synchro version for larger bases, by simply pressing the fingers on any area of the front panel, allows the opening of the drawer with high lateral stability.

OneTouch

A SOLUTION FOR ANY NEED

The Excel G slide responds to any market need, with a complete range of applications and standard dimensions available in two versions:
· Plug-In, with the pin and the Anti-Lift system, for the perfect fixing that leaves out any chance of potential overturning
· Easy-Fix, with fast hooking clips and built-in Anti-Lift system, absolute guarantee of stability and superior performance.
